

Add your own virtual background in Zoom:

First step is to look at your settings when logged in to ju-se.zoom.us.

Go to "Settings" in the menu to the left and choose "In Meeting(Advanced)". check that Virtual background is set to on. (Blue means on)

Next step is to go the Zoom client on your computer. Log in and go to your profile picture up in the right corner. Click on "Settings" and then "Virtual Background". You can choose one of the backgrounds already there or upload your own by pressing the plus sign. The image you choose to upload should have an aspect ratio of 16:9 and a minimum resolution of 1280x720. (preferably 1920x1080) But be aware that using a virtual background adds to the workload on your computer and network.
